## APPLES AND APPLE TREES.

In North America a decade ago the nurseries had over 240,000,000 apple trees growing. We export over 1,000,000 barrels a year, many of them to England.

If all the fruit crops falled, and apple were left to us, there would not be much to mourn, for nearly everyone likes apples, and physicians tell us they are a panacea for all evils.

Apples are grown to-day in Europe northern India, South Africa, China Australia and New Zealand. The orig inal wild crab of Russia has developed into the several thousand varieties which we know to-day.

Curiously enough, the apple belongs to the rose family, and how it was leaved transformed into a stout tree is a mystery. It is supposed to have been indigenous to northern Russia in remote times and to have spread from there. To-day this country is the great apple-producing district.

It is said that the peasant of the south of France spends on food for a family of five an average of twopence

This is the first pardon pending appeal granted under the new constitusion, which forbids in express terms the granting of pardons "before conviction," as was permitted under the old constitution. This case therefore raises an unique question as to whether a prisoner is "convicted" in the meaning of the constitution, while his cause is pending for final determination in the supreme court. But even admitting that the pardon might be unconstitutional, there is a further and still more curious question or complication which Our supreme court has held that a violation of the constitution can only be pleaded by the party whose case the prisoner being the party whose "rights are affected" will hardly ask to have the pardon annulled. That being the case the only course open to the listrict attorney, if he still desired to pursue the matter, would be to have the party re-arrested. The prisoner would then sue out a writ of habeas

The board of control has recommended to the governor the pardon of Will Purvis, the famous whitecap prisoner of Marion county, serving a life senence for murder. This action is based mainly upon a strong letter from D'striet Attorney Neville, who prosecuted Purvis upon the charge of killing Will Buckley, a fellow-whitecapper, in 1895. In his letter to the board Mr. Neville states that Purvis was convicted at the time when feeling was high against whiteeap outrages, then of almos nightly occurrence in that section, and that he would never have been convicted but for the testimony of Buckley's brother, who swore he saw Purvis fire the fatal shot. Mr. Neville further stated that he had since had reason to believe Buckley's brother was mistaken. He strongly recommended the par-

State Pensioners. The auditor's office has received all he pension reports from the different counties, except those of Lafayette, Conhoma and Madison. Last year 4,543 pensions were granted. The total number this year is 3.459, which shows a decrease of 883 from last year's figures, or about 20 per cent. This decrease is the result of the provisions of the law passed by the last session of the legislature in der to prevent the pension appropria tion from being diverted toward unworthy objects, and the result upon the face of these figures shows that its object has been accomplished. It is estimated that \$50,000 of the \$75,000 approprintion for this year's pension roll will be taken up by the three preferred classes. The remainder prorated equally among the remaining pen sioners, will give each approximately \$10, being an increase of \$3 over last year, when each pensioner only re-

NEW YORK, Nov. 14.—Among the pas cogers who arrived here on the steamer Yucatan, from Havana, today was Col. J. H. Bliss, of the subsistence depart ment of the army. Col. Bliss was or dered to Cuba October 14 to locate camp ites for the army of occupation. He brings with him a report of the work done there, and this report he will take to Washington tomorrow.

When asked as to the present state of affairs in Havana, the colonel said that the city was in a filthy condition. "I do not believe," he said, "that the ity has ever been in worse shape. The copie are alarmed over the spread of vellow fever. They realize that there are no facilities for fighting the disease. and that it will spread quickly if it remains in its present condition. The people seem to think that the city is a good place to keep away from unless

they are there on business of the most pressing kind. "The Spaniards are bringing their roops from the interior cities to the coast towns, and I believe that they are going on as fast as they can with the work of evacuating the island."

In speaking of his work on the island, the colonel said: "We have succeeded in locating sites for camps around Havana, Matanzas and Cardenas. The sites selected have been chosen with a view to their elevated positions and their advantages for good drainage. I believe that they are located in the best possible tions, and that the health of the soldiers

All efforts to recenture him have proved futile. It is believed that he has reached the northern par-

of the island. The Santiago chamber of commerce has requested Gen. Wood, governor o the military department, to turn over to the treasurer all moneys received as taxes on shipping, for harbor improve ments, proposing to undertake the future collections and to take charge of the harbor work without government supervision. It is not probable that Gen. Wood will accede to this request without a personal representative in the chamber, and he will undoubtedly

retain the veto power himself. There is a great deal of complaint about the methods of an American express company having a local office here. The assertion is made that the company's agents accept newspapers for delivery here, but do not deliver them. It is said that many tons of such matter now lie at Tampa.

## GEN. FLAGLERS'S REPORT.

uteresting Facts Concerning the Providing of Arms and Ammunition and the Coast Line Defense.

Washington, Nov. 14. Gen. Flager, chief of the bureau of ordnance, has made his annual report to the recretary of war. It shows that there were expended during the fiscal year ending June 30, 1898, \$7,348,795, and that there still remains of the approprintion made for the ordnance bureau \$19,793,359. This large sum is derived from the appropriations for the iscal year which were made for war purposes amounting to \$21,504,592,

The Equipment of Volunteers. Regarding the equipment of volun-teers, the general thinks it would be as well to have the government equip them instead of bringing their state arms into service, saying that it could be done as quickly, owing to the condition of the arms of the state troops, He speaks in terms of praise of the oanner in which work has been per-

formed in arsenals and ordnance factories in the rush that was made in putting the country on a footing for war with Spain. As to the equipment of the army, he says: Impracticable to Keep Supplies on Hand. "So long as the principal dependenc in this country in a time of war is

large volunteer force, newly levied, it is impracticable to keep on hand large supplies of eavalry, artillery and horse equipments, as these in the course of a few years will not only deteriorate, but will have to be materially modified to keep pace with improvements. The major part of such material can, by taking advantage of the resources of Rock Island and the other arsenals and the numerous private establishments capable of producing it, be supplied as rapidly as troops can be raised nustered into service and prepared for campaign. There should, however be on hand field and select artiflers with carriages and a partion of the harness required for 500,000 men. Such months after initiating the work."

Must be Prepared for Emergencies. For equipping an army with a sup ply of small areas, he thinks there hould be a supply of 100,000 on hand of any new arm, and the arsenals kept p condition so as to produce 2,500 per

Secretary Hay has been bombarded with letters from persons in all sections of the country, interested in claims filed by American citizens for personal and property injuries sustained during the last Cuban rebellion. The secretary's correspondents urge upon him the ne cessity of cabling instructions to the American commissioners to demand that a provision be inserted in the peace the aliber Springfield ride an equality treaty devising means for the settle ment of all claims. It is pointed out that one of the causes of the war, while was referred to by the president in his message to congress last spring, was the number of claims against Spain and the inattention of the Madrid gov ment respecting them, and it is believed that the senate will object to ratifying

a treaty which does not make som

provision for their settlement. It is estimated today that the aggre gate amount of the claims was \$24,000, 000. Many are exorbitant, however and some would be thrown out if considered by an international commission It is understood it is the intention to have the American commissioners bring the claims up during the next session and after the Philippines are out of the way the subject will undoubtedly be discussed. The commissioners have a statement of claims filed, and it has been suggested that Judge Day and associates may inform Spain that in consideration of the cession of the Philippines to the United States, this govern ment will assume the claims of Ameri can citizens. The pence protocol doe not provide that claims shall be considered, and this may debar them from serious consideration by the commis sion, except in connection with the Philippines. The Spaniards, it is anticipated, will submit claims against the

It is only a fortnight since Salvador, Honduras and Nicaragua joined their destinies and formed the United States of Central America. The people of Salvador have not been enthusiastic over the new scheme, particularly as it appears that the financial burdens of maintain ing the new State will fall most heavily upon them, owing to their having denser population than either of the other parties to the consolidation.

## THE PARIS CONFERENCE.

The Peace Commission Rapidly Approaching the Critical Point in the Settle-

ment-May End in Rupture Paris, Nov. 14.-Among on-lookers here the impression exists—though it is not the result of any official statement-that the Spanish peace commissioners will not consent to a treaty which the American commissioners

could sign,
The Spanbards May Abandon Their Struggle. It seems almost possible, also that in the pitfable pressure to which the Spanish commissioners are subjected between their large creditors, who are on the spot watching them, and the stern attitude of the United States, the Spaniards may abundon their strug-

gles and leave the two forces to confront each other. It has not yet been decided whether the next joint session is to occur today of to-morrow. The Spaniards, it has been arranged, will inform the Americans this morning whether they need the day to prepare their next memorandum. If they do the meet-

Under the rules of procedure adopted by the conference, it is understood that the deliberations may not be unexpectedly concluded by either

The statement is printed here that the last memorandum from the Americans is regarded by the Spaniards as a virtual ultimatum. But, as a matter of fact, the Americans have not presented an ultimatum. It is only since Wednesday last that relating to the Spanish negotiations, in the Spaniards have begun to feet that the Americans purpose taking over sented to congress when that body core the Philippines, and that too without

any assumption of Spanish indebtedthe instructions which were sent to the this it may be that Spain's next presentment in conference will be the suwere very emphatic in declaring that preme rally of her diplomats, argumentative and tactical forces. Ever since October 1 it has been within the range of possibility that at any meeting an open rupture might occur, and on one or two occasions, it might have been easily a fact even before the taking up of the Philippine question. The boundaries of the field in which that question is being worked out are becoming more apparent, and be far off. If a treaty is to result here, it may fairly be expected within three weeks, although it is not true-as reported from the United States yester-
